

Denis Kuznetsov

Machine Learning Engineer | Full Stack Developer

Helsinki, Finland | denisk399@gmail.com | +358415720381 | linkedin.com/in/dereden
dereden399.github.io | github.com/Dereden399

Summary

Machine Learning student at Aalto University with hands-on experience deploying AI features to production systems serving thousands of users. I've built and shipped end-to-end ML pipelines: from data preprocessing and model training to integration into real applications, and I bring several years of full stack engineering experience building scalable, production-grade web systems. Comfortable working across the full lifecycle of applied ML: ideation, implementation, deployment, and iteration.

Skills

Programming languages: Python | Javascript | Typescript | C++ | Scala | Swift

Machine Learning: PyTorch | TensorFlow | Scikit-learn | Data preprocessing pipelines | OpenAI API

Data: SQL | Complex schema design | Large-scale data preprocessing

Web and Mobile: React | Svelte | Vue | Astro | Express | Deno | React Native | SwiftUI

DevOps: Docker | Git | GitHub Actions | AWS

Work Experience

Aalto University, Finland | Research Assistant | 11/2023 - 07/2024, 01/2025-present

- Built an AI-powered TA assistant that analyzes student code from help tickets, identifies errors, and generates brief explanations and recommended responses - significantly speeding up TA workflow
- Integrated chatbot assistants and auto-grading features
- Developed a file submission system that significantly improved memory usage across the platform
- Worked extensively with SQL, complex database schemas, and production data pipelines

Aalto University, Finland | Teaching Assistant | 09/2023 - 04/2024, 01/2025-04/2025

- Coached multiple student groups in a programming course; one team delivered a notable course project
- Supported students across multiple math courses (Calculus, Probability, Discrete Math) in Aalto's Laskutupa

Nordic Fun Gaming, Finland | Software Developer | 12/2024-present

- Owned full development of web games end-to-end: frontend, backend, infrastructure, backoffice tools, and deployment
- Delivered a product generating over 60% of the company's total revenue under a tight client deadline
- Built scalable web games supporting tens of thousands of players

Education

– MSc in Machine Learning, Data Science, and Artificial Intelligence, 2025 - present.

Aalto University, Finland

– Exchange semester, 2024

Nanyang Technological University, Singapore

– BS in Computing, Computer Science, 2022 - 2025

Aalto University, Finland

GPA: 4.85/5.0

Projects

Bachelor's Thesis: ML Methods for Real-Time Image Quality in Computer Graphics

- Literature review supervised by Jaakko Lehtinen (Aalto / NVIDIA). Received excellent feedback and a top grade

Cross-Lingual Toxicity Detection (current coursework)

- Studying approaches for detecting toxicity in messages across unseen languages under tight system constraints

Voice Emotion Recognition | github.com/Dereden399/voice-emotion-recognition

- Built a neural network model achieving 80% accuracy classifying 8 emotions from voice samples

Awards

- First Place, Saint Petersburg District Programming Contest
- Third Place, Supercoder Competitive Programming Contest, Aalto University
- Crowd's Favorite Project, Build-it Hackathon | github.com/Egor1o/EmoVoiceSense
